GUI		Login page (base)		Login page : action vfx				Clock-in/out page : action vfx		Clock-in/out page (base)				Tabs/navigation menu + action vfx		View of tables page		Table mang. vfx				Tab for order mang. + order mang. page		Order mang. page: vfx				Table mang. and order mang. vfx				Tabs staff mang., inventory mang., shift mang., menu mang., refund mang.		Staff mang. page + vfx		Inventory mang. page + vfx		Menu mang. page + vfx		Shift mang. page + vfx		Refund mang. page + vfx				Review and confirm GUI components and details									
DATABASE		Design the base schema		Create the database				Connect database to login component to store login data		Connect database to clock-in/out component to store shift data				Connect database to app. function(s) for table status mang.												Connect database to app. function(s) for order status mang.		Connect database to app. function(s) for data storage relating to orders mang.																				Review and verify database efficiently stores all required data							
CODE		Code module for login/logout and module for page navigation		Code login details creation function				Code clock-in/out module: functions for clocking in/out, taking lunch breaks, tracking time, converting time metrics		Integrate with login module				Implement page navig. & clock-in modules		Code functions for viewing tables and managing status (R->G)		Integra te w/ previou s								Implement page navig. & clock-in modules		Implement functions for table/order viewing and management, build functions for taking orders and payments, build functions for requesting refunds		Integrate w/ previous						Implement page navig. & clock-in modules		Code modules for staff profile mang., staff shift mang., inventory mang., menu mang., data viewing and querying, and refund viewing and approval.		Integrate w/ previous						Review program to ensure inclusion of all requirements, functional and complete integration, and satisfactory performance									
TESTING		Design tests for login module		Test login module functions, GUI, and connection to database																																																			
								Design tests for clock-in module		Test login module functions, GUI, and connection to database				Design tests for busboy table mang. functions		Test busboy functions, GUI/page navigation, and connection to database										Design tests for kitchen- staff order mang. functions		Test kitchen-staff functions, GUI/page navigation																						Design tests for overall system		Test overall system
